CATALOGUE 2.0

WHY ARE FILTERS SO IMPORTANT?

This is a question which is commonly asked all around the world. Well, the reason an oil filter is so important is, due to all the oil that lubricates your engine flows through a cleaning or filtration system, which is your vehicle's **OIL FILTER**.

The engine oil filter traps all the dirt and particles that try to go through into your engine. The better the oil filter, the cleaner the oil, which in turn provides a healthier engine.

Similarly, a new **AIR FILTER** allows your vehicle's engine to get clean air, a key component in the combustion process. The air filter prevents airborne contaminants such as dirt and dust.

A Good quality filters helps to increase torque and life of your vehicle

INTRODUCTION

ABOUT THE COMPANY

JANTA AUTO INDUSTRIES was established in 1972, We started with a small unit for manufacturing outer casing for Auto Cables. In the year 1985, PRIYA CABLES as a brand was conceptualized. Soon from a humble beginning we became one of the leading brands in the industry by serving our esteemed customers with high quality products and consistent services. We are pleased to **LAUNCH** yet another venture in automotive industry **PRIYA PERFORMANCE**

FILTERS.

Priya Performance Filters will be available in full range of Air Filters, Oil Filters and Fuel Filters for Two Wheelers and Three Wheelers.

CATALOGUE

We proudly present our first Handbook for Priya Performance Filters. In this Catalogue we have tried to cover the entire range of automotive filters.

CUSTOMER IS ALWAYS A KING

We at Priya Cables and Priya Performance Filters firmly believe that our customer is a KING. You are our priority and we constantly need your support to maintain the topmost position in the market. We promise to serve you with best of Quality, Service and Prices.

Regards

Janta Auto industries

J.P. SINGH

Chairman, Priya Cables and Priya Performance Filters.

USEFUL INFORMATION

AIR FILTERS

WHAT IS THE ROLE OF AN AIR FILTER IN YOUR VEHICLE?

It is well known that internal combustion engines need air (namely oxygen) to burn fuel. During the intake stroke, valves open to allow the piston to act like a syringe as it moves downward; drawing in ambient air through the engine's intake system

HERE COMES THE ROLE OF A GOOD QUALITY AIR FILTER

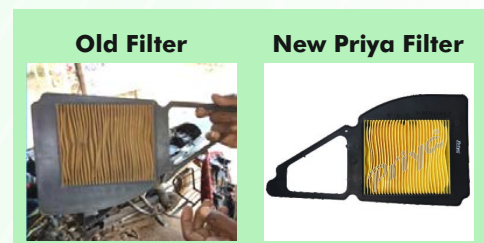

Air filters clean the air before it is passed through to the cylinders to prevent dust, dirt, grit, and other debris from causing any damage to the engine parts

When to change Air Filters?

8 Dirty Air Filter indications: How to Know When to Change Your Air Filter?

- Air Filter Appears Dirty. ...
- Decreasing fuel Mileage ...
- Your Engine Misses or Miss Fires. ...
- Strange Engine Noises ...
- Check Engine Light Comes On ...
- Reduction in Horsepower...
- Flames or Black Smoke from Exhaust Pipe....
- Strong Fuel Smell....

After getting the above symptoms we go for a change in filters. In Private vehicles it can be changed on scheduled service around 5000 km or 1 year whichever is earlier and whereas in commercial segment it is 3000 km.

We, at Priya Performance Filters, use **180GSM IMPORTED PAPER** and continuously updating our technology to provide you with best in class filters which meets all the OE requirements for your vehicle.

We use the best available paper, PU, Sheet metals or other child parts.

USEFUL INFORMATION

OIL FILTERS

WHAT IS THE ROLE OF AN OIL FILTER IN YOUR VEHICLE?

Combustion and friction of engine parts creates waste which accumulates in the engine chamber.

The oil filter helps remove contaminants from your vehicle's engine that can accumulate over time. These contaminants mix in the fresh oil and that oil kept passing through the oil filter and get trapped in the filter, hence supplying the clean oil back into the engine. This is a continuous process which is completed with the help of a good quality Oil filter and an oil pump.

Clean motor oil is important because if the oil were left unfiltered for a period of time, it could become saturated with tiny, hard particles that can wear surfaces in your engine.

WHY IT IS IMPORTANT TO CHANGE THE FILTER PERIODICALLY?

Normally on every oil change it is recommended to change the oil filter. If the oil filter is not changed periodically, the filter can become severely clogged, reducing the volume of oil passing through the filter and into your engine. Without this oil, your engine can suffer severe damage.

WHEN TO CHANGE OIL FILTERS?

Beside periodic change your vehicle can give you many indications which will help you know when to change the oil filter.

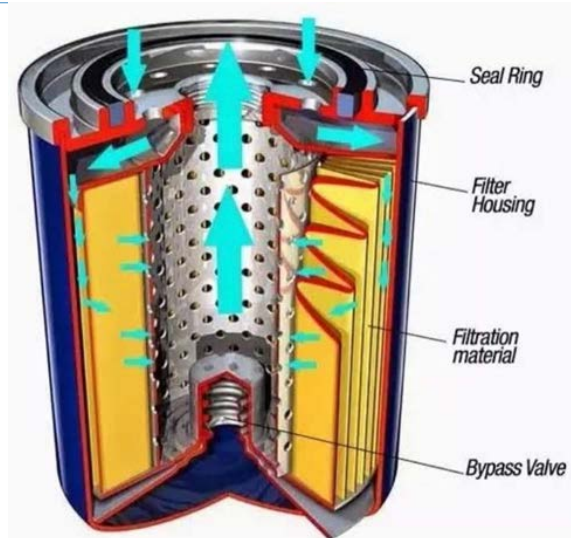

There can be many factors or indicators which show when to change your vehicle's oil filter the most important are listed

- Oil Filter is generally changed on every oil change.
- Oil Filter can be changed every 3000 km also depends on the range given by vehicle manufacturer.
- Poor Performance. Poor performance can be any number of things and a clogged oil filter is one of them. ...
- Engine Sputters... This might be due to a clogged oil filter.
- Audible Metallic Noise. ...
- Low Oil Pressure. ...
- Exhaust That Is Dirty.

On getting above symptoms we must go for a change in oil filter.

WHAT IS THE ROLE OF A FUEL FILTER IN YOUR VEHICLE?

The primary purpose of a diesel fuel filter is to protect the fuel system components of the engine. A diesel fuel filter must be designed to remove extremely small particles to prevent the premature failure of these components. Many diesel fuel systems contain several fuel filters including a primary and secondary filter, as well as a fuel screen located at the fuel tank or transfer pump. A fuel filter is located in the fuel line to screen out contaminants such as dirt, dust, debris and rust particles from the fuel. A fuel filter protects the critical parts of the engine, by filtering out foreign particles that can potentially damage a fuel injector.

ANATOMY & WORKING OF AN OIL FILTER

GUARANTEE

- ★ Priya Performance Filters comes with a replacement guarantee against any manufacturing defect.
- ★ We will replace FREE of cost, if any piece found defective due to manufacturing fault & intimated within 30 days of purchase.

**A QUALITY PRODUCT FROM
THE HOUSE OF PRIYA CABLES**

Terms and Conditions

1. Prices are subject to change without prior notice.
2. Payments must be made by crossed Cheque / IMPS / RTGS.
3. Company is not Responsible/Liable for any damage once consignment is booked.
No claim will be entertained in this regard.
4. Please provide us with your GSTIN/PAN numbers of your firm at the time of placing the order.
5. Orders will only be accepted in writing via E-mail or any Messenger.
6. 100% advance should be sent in case of a new dealing.
7. All disputes are subject to Delhi Jurisdiction.
8. Returned goods if any will be accepted only in case of any manufacturing defect or wrong supply.
